

## €-coin decreases further in July

For immediate release: 08.30 BST; 09.30 CEST; Friday, 5 August 2022

- **€-coin** decreased further in July (to 0.38, from 0.88 in June), signalling a marked weakening in economic activity in the euro area.
- The worsening recorded for consumer and business confidence and for some demand indicators, including new car registrations, contributed to the decline.
- The **€-coin** indicator developed by the Bank of Italy provides a summary index of the current economic situation in the euro area. The indicator is an estimate of quarterly GDP growth shorn of the most erratic components (seasonal variations, measurement errors and short-run volatility). **€-coin** is published monthly by the Bank of Italy and CEPR.
- Next **€-coin** release dates: **Friday, 5 September** and **Monday, 3 October** (provisional).

### €-coin and euro-area GDP – July 2022

Source: Bank of Italy and Eurostat.

Note: The €-coin series is based on the real time estimates of the indicator at a given date and hence the series is not revised. On the other hand, the GDP growth rates are calculated on the basis of Eurostat's most recently published series and do reflect any changes in the historical data.

**€-coin** is constructed monthly by exploiting a vast set of macroeconomic time series (e.g. industrial production indices, business and household surveys, demand indicators, and stock market indices) in order to extract the data needed to estimate the underlying trend of euro-area GDP growth.

**€-coin** precedes by several months the official euro-area GDP figure released by Eurostat and gives an early indication of the trend net of any erratic or short-term components.

**The following table shows the performance of the €-coin indicator over the last year:**
