

## €coin falls again in June

**For immediate release: 08.30 BST; 09.30 CEST; Thursday, 28 June 2018**

- In June **€coin** fell to 0.48 (from 0.55 in May), the lowest level since November 2016.
- Greater caution on the part of households and firms and the weak industrial cycle continue to hold back the indicator, which has also begun to feel the effects of the slowdown in global trade.
- The **€coin** indicator developed by the Bank of Italy provides a summary index of the current economic situation in the euro area. The indicator is an estimate of quarterly GDP growth shorn of the most erratic components (seasonal variations, measurement errors and short-run volatility). **€coin** is published monthly by the Bank of Italy and CEPR.
- Next **€coin** release dates: **Friday, 27 July** and **Friday, 31 August** (preliminary).

### €coin and euro-area GDP – June 2018

Source: Bank of Italy and Eurostat.

Note: The €-coin series is based on the real time estimates of the indicator at a given date and hence the series is not revised. On the other hand, the GDP growth rates are calculated on the basis of Eurostat's most recently published series and do reflect any changes in the historical data.

**€coin** collates data from a large set of macroeconomic time series (industrial production indices, business surveys, demand indicators, stock market indices and more). It extracts the information that is relevant for tracking underlying GDP trends for the entire area.

The **€coin** estimate is timely, anticipating Eurostat's official release of the area-wide GDP growth figure by several months. It also provides a reasonably close forecast of the quarterly growth rate net of the more volatile components. The estimate of underlying growth trends by **€coin** has two key advantages:

- (i) monthly frequency, with release several months ahead of the official euro-area GDP estimate;
- (ii) immunity to the short-term fluctuations and measurement errors that mark quarterly output growth; that is, the index figure is an indicator of the euro area's actual growth momentum.

**The following table shows the performance of the €coin indicator over the last year:**

Month	€COIN
June 2017	0.62
July 2017	0.63
August 2017	0.67
September 2017	0.71
October 2017	0.72
November 2017	0.84
December 2017	0.91
January 2018	0.95
February 2018	0.96
March 2018	0.89
April 2018	0.76
May 2018	0.55
June 2018	0.48
