

€-coin stabilizes at a high level in October

For immediate release: 08.30 BST; 09.30 CET; Friday, 27 October 2017

- In October **€-coin** stood at 0.72, remaining essentially stable at the high level reached in September (0.71), after increasing for four consecutive months.
- The positive trend in industry and a further improvement in business confidence more than offset the delayed impact of the appreciation in the euro exchange rate over the summer.
- The **€-coin** indicator developed by the Bank of Italy provides a summary index of the current economic situation in the euro area. The indicator is an estimate of quarterly GDP growth shorn of the most erratic components (seasonal variations, measurement errors and short-run volatility). **€-coin** is published monthly by the Bank of Italy and CEPR.
- Next **€-coin** release dates: **Thursday 30 November** and **Friday 29 December** (preliminary).

€-coin and euro-area GDP – October 2017

€-coin collates data from a large set of macroeconomic time series (industrial production indices, business surveys, demand indicators, stock market indices and more). It extracts the information that is relevant to tracking underlying GDP trends for the entire area.

The **€-coin** estimate is timely, leading Eurostat's official release of the area-wide GDP growth figure by several months. And it provides a reasonably close anticipation of the quarterly growth rate net of the more volatile components. The estimate of underlying growth trends by **€-coin** has two key advantages:

- (i) monthly frequency, with release several months ahead of the official euro-area GDP estimate;
- (ii) immunity to the short-term fluctuations and measurement errors that mark quarterly output growth; that is, the index figure is an indicator of the euro area's actual growth momentum.

The following table shows the performance of the €-coin indicator over the last year:

Month	€-COIN
October 2016	0.38
November 2016	0.45
December 2016	0.59
January 2017	0.68
February 2017	0.75
March 2017	0.72
April 2017	0.67
May 2017	0.60
June 2017	0.62
July 2017	0.63
August 2017	0.67
September 2017	0.71
October 2017	0.72
